

## What we do:

Established in 1992 by a group of technical and marketing personnel, Valutech helps process industries to identify their needs and provides suitable solutions to their problems. We've focused our activities on heat transfer products and evolved into an organization specializing in design and supply of various types of heat exchangers, steam traps and check valves used in heating and cooling processes.

## What we sell:

We sell heat exchangers, steam traps and check valves to the process industry. As exclusive Ontario representatives for Alfa Laval Inc, we are also dedicated to helping customers in solving Alfa Laval process equipment problems.

## How we ensure quality:

We are ISO 9001:2000 registered so you can be assured of a consistent and trusted product.

## Products:

### Heat Exchangers

We distribute heat exchangers for a variety of applications and industries from process to chemical, biotech, HVAC and refrigeration.

### Steam Traps

We supply steam traps and solutions for steam users.

### Check Valves

We offer a complete line of in-line spring loaded piston type **check valves** for almost any service application. When very specific cracking pressures are required, we can provide customized springs to meet the needs of the customer.

### Pool Heaters

We offer swimming pool owners and contractors a much more affordable alternative to conventional direct fired pool heaters. Our heat exchangers offer advantages that direct fired **swimming pool heaters** simply cannot meet.
